SABRINA PATTAVINA

sabrina.pattavina@gmail.com | New York, NY | in/sabrina-pattavina | sabrinacyber.com

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in threat intelligence, SIEM-based security monitoring, and investigative analysis across academic, internship, and competitive environments. Methodical, detail-oriented approach with strong communication across technical and non-technical audiences.

EXPERIENCE

Junior Cybersecurity Analyst Intern | Elliott Investment Management — New York, NY *Jun 2023 – Aug 2023*

- Assisted in deploying and configuring MISP to support centralized cyber threat intelligence workflows within the security operations environment.
- Researched and evaluated 50+ cyber threat intelligence sources, selecting and integrating 8 public and commercial feeds while troubleshooting data-ingestion issues.
- Automated daily ingestion of threat intelligence feeds via scheduled jobs and API integrations to maintain timely, consistent data updates.
- Developed Splunk queries and automated IOC lookup reporting to accelerate indicator matching and support incident triage.

Volunteer Tech Coach | Search and Care — New York, NY *Jan 2024 – Mar 2025*

- Provided one-on-one technology coaching to older adults (60+), resolving device, account, and connectivity issues.
- Delivered clear, patient guidance on safe technology use, helping clients build confidence and independence.

Tech & Digital Strategy Volunteer | Women and Youth Advancement Inc. (WOYA) — New York, NY *Mar 2025 – Present*

- Coordinate on-site and remote event technology operations for WOYA programming, including UN-affiliated events.

Bartender | Brooklyn Steel — Brooklyn, NY *Apr 2017 – Present*

- Maintain accuracy, composure, and clear communication in a fast-paced, high-pressure, team-based environment.

PROJECTS & HANDS-ON EXPERIENCE

WiCyS + Target Cyber Defense Challenge (2025)

- Investigated a multi-stage simulated breach by correlating OpenSearch logs, network traffic, and Windows Registry hives using DQL and hivexsh to detect persistence mechanisms and anomalous artifacts.
- Applied OSINT and protocol analysis (SMTP, DNS tunneling) to reconstruct attacker activity and validate data exfiltration.

Enterprise Vulnerability Management Simulation — *Log(N) Pacific Cyber Range*

- Built and managed Windows/Linux VMs in Azure and conducted vulnerability scans using Nessus, implementing PowerShell-based remediations to reduce findings.
- Implemented agent-based vulnerability monitoring using Nessus Agents to simulate remote endpoints and mobile workforce scenarios.

Security Analysis of a Medical Device — *NYU Coursework*

- Conducted an end-to-end security assessment, defining security requirements and developing a STRIDE threat model and risk assessment.
- Patched Python vulnerabilities (hardcoded credentials, SQL injection) with validated test cases.

Additional Training: US Cyber Challenge East Boot Camp; Hack The Box, IBM Cybersecurity Analyst Professional Certificate.

EDUCATION

Master of Science in Cybersecurity | New York University, Tandon School of Engineering *May 2024*

- Cyber Operations (CAE-CO) specialization

Bachelor of Science in Computer Science and Information Security | John Jay College of Criminal Justice *Sep 2020*

CERTIFICATIONS

ISC2 Systems Security Certified Practitioner (SSCP) • CompTIA Security+

TECHNICAL SKILLS

Threat Detection & Investigation: Log correlation, IOC analysis, OSINT, OpenSearch (DQL), Splunk

DFIR: Windows Registry analysis, memory analysis, Autopsy, network traffic analysis

Security Platforms & Tools: MISP, Nessus/Tenable, Wireshark, Burp Suite, Metasploit, Nmap

Programming & Scripting: Python, SQL, Regex, Bash

Systems & Networking: Linux, Windows, TCP/IP, DNS, VirtualBox, Azure (VM deployment)
